

GREEN SPACES CLEAN WATERS

Landscaping ideas that improve water quality along the Mississippi River

This booklet produced by Tree Trust in 2005 introduces and demonstrates landscaping ideas that improve water quality, specifically along the Mississippi River. This comprehensive publication is for residents and businesses to learn ways they can slow down, clean and reduce water runoff on their own property that would otherwise enter the storm sewer systems. Some of the landscaping ideas covered include lawn care, rain gardens, rain barrels, green roofs, buffers and green parking. In the booklet, there are drawings of an urban residential home and a small business showing how all of the landscaping ideas can be incorporated together.
